M - Academic Master’s Degree Program  
D - Academic Doctoral Degree Program  
PM - Professional Master’s Degree Program  
PD - Professional Doctoral Degree Program
The Universidade Federal de Santa Catarina (UFSC) has its main campus located in Florianópolis, capital of the state of Santa Catarina, Brazil. Founded on 18 December 1960 with the goal of promoting teaching, research and outreach, UFSC delivers free and public education and is placed among the best universities in Brazil and in Latin America. Such recognition comes from the quality of its teaching, research and outreach activities, which include the work developed by graduate programs on its five campuses.

*Stricto sensu* graduate programs at UFSC are of four types: academic master’s degree (M), academic doctoral degree (D), professional master’s degree (PM) and professional doctoral degree (PD). The academic programs (M/D) are targeted at higher education teaching and research, while the professional programs (PM/PD) train professionals to meet particular needs of the job market via the study of techniques, processes and selective topics. Master’s programs have a 24-month duration, while doctoral programs last 48 months.

Currently, UFSC offers 59 doctoral degree programs and 87 master’s degree programs. Among the master’s programs, 67 are academic and 20 are professional. UFSC’s first professional doctoral degree was created in 2019 by the Graduate Program in Nursing Care Management.

All graduate programs are evaluated by the Coordination for the Improvement of Higher Education Personnel (CAPES), an agency of the Ministry of Education which performs a fundamental role in the expansion and consolidation of graduate programs in Brazil. In the last CAPES evaluation, 20 programs at UFSC were considered of international excellence (grades 6-7 out of 7). Among the 89 graduate programs offered in our university, 46 were graded 5 or higher.

In 2019, four new master’s programs and three new doctoral programs were created. The academic programs receive funding from the Coordination for the Improvement of Higher Education Personnel (CAPES), the National Council for Scientific and Technological Development (CNPq), and the Santa Catarina State Foundation for the Support of Research and Innovation (FAPESC) in order to develop their activities and grant student scholarships. Doctoral students may also obtain scholarships to carry out research internships in foreign universities; today, UFSC has agreements with 366 universities in more than 44 countries. This kind of cooperation allows the qualification of the work developed at UFSC, contributing to raise even more the recognition gained by its graduate programs in Brazil and abroad.

Complying with its internalization goals, in 2018, UFSC was selected to participate in the CAPES Institutional Internationalization Project (CAPES-PrInt), receiving financial resources to carry out the following objectives: promote the development, implementation and consolidation of a strategic internationalization plan in priority areas of knowledge; stimulate the formation of international research networks to improve the quality of academic production at graduate level; expand the actions taken in the institution to support the internationalization of graduate programs; promote faculty and student mobility, with focus on incoming and outgoing doctoral students, postdoctoral researchers and faculty members from graduate programs with international cooperation; encourage the transformation of the institution into an international environment; and integrate other CAPES funding actions to the internationalization effort.

The UFSC Institutional Internationalization Project has the participation of 40 graduate programs and is made up of 27 interdisciplinary subprojects distributed in five major themes: Languages, Interculturality and Identities; Nanoscience and Nanotechnology; Human Health; Environmental Sustainability; and Digital Transformation: Industry 4.0 and Services. This project has the involvement of 300 foreign partner institutions, allowing for the strengthening of network research and academic exchange.

The Universidade Federal de Santa Catarina is continuously expanding and improving the quality of its graduate programs. Conscious of its vocations and academic potential, it constantly renews itself by offering new multi- and interdisciplinary programs, while maintaining interaction among the programs, constructing international teaching and research networks, stimulating creative and innovative activities, and responding to the needs of the Brazilian society with qualified knowledge, services and sustainable solutions.

* In Brazil, graduate school is divided into stricto sensu and lato sensu programs. Lato sensu programs are short-term specialization degrees — including MBA programs —, while stricto sensu programs consist of master’s and doctoral degrees.
MISSION
The Graduate School at UFSC has the mission to produce, systematize and socialize philosophical, scientific, artistic and technological knowledge, broadening and deepening students’ education for professional practice, critical thinking, and national and international solidarity.

VISION
To provide an excellent, inclusive, innovative, interdisciplinary and internationalized graduate education.

VALUES
The Graduate School at UFSC is guided by the following values: academic excellence, freedom of inquiry, creativity, innovation, transparency, cooperation, diversity, interdisciplinarity, internationality, interculturality and dialogue.
